

Bridging the Video Gap

High-quality **video communication** that is **flexible, easy** and **affordable**:

Get together and get it done at the **speed of sight.**SM

- **Multiparty** conferencing and broadcasting
- **Multiple simultaneous resolutions**, including HD, to serve any use case from laptops to boardrooms and beyond
- **Hosted video service** — no network components or IT expertise to manage and maintain
- **End-to-end encryption** on any network, FIPS 140-2 certified
- **Collaboration tools** include an innovative media player, desktop sharing, recording/playback, text chat, and audio dial-in and dial-out
- **Deploy anywhere**, inside or outside your organization, with a free software download to a PC
- **Free, automatic updates** and ongoing enhancements — no obsolescence or recurring licensing fees
- **Interoperability** with H.323 systems (new for 2010)

Appia's flexible video communication solutions bridge the gap between high-end "telepresence" systems and lower-end desktop products. With Appia, you enjoy high-quality video, voice, and collaboration whenever and wherever you need it, for about the price of a conference call.

Best of all, Appia's video communication solutions are customized to fit the exact needs and budget of any organization, making them easy to afford, deploy and use. For group settings, Appia's all-inclusive conference room packages are plug-and-play, professional grade, and priced less than most codecs alone! All packages can be customized to suit your specific needs.

Room packages include:

- Codec with wireless Bluetooth keyboard and mouse
- Sony Bravia 1080p High Definition LCD (46" or 52")
- Sony SD or HD Camera with wireless remote
- Professional conference microphone
- Optional Pedestal (stationary or mobile)
